

The world faces a number of inequalities, for example:

More than
50%
of the worlds population cannot obtain
essential health services

This is just one of the inequalities that drive us to play our part in creating a 'fairer world'.

We are committed to achieving the United Nation's Goals for Sustainable Development in our 7 international hubs.

- Delivering hands-on workshops on healthy behaviours, including nutrition
- Providing essential health care check ups
- First aid training to communities
- Facilitating education on prevention of health issues
